Hey fans! This is William reporting from Fuhe Junior High School. All runners are ready now!

Go! Go! Go! Wow, Class 732 is having a brilliant start, and its first runner is running to their second runner now. But Class 733 is right behind him! Oh my! Class 733 is leading now! But there is something wrong with its third runner; he is slowing down. Class 732 is back to their first place again! Look! Class 736 is now passing Class 733 and Class 732! People are shouting for the incredible runner!

Here come the last runners. The leading class is Class 736, but Class 733 is close behind. Wait! Class 735's runner, with incredible speed, is passing the three runners from its fourth place and going for the finish line. The first place goes to Class 735! What an astounding show of teamwork and speed!

Ms. Hsu is showing some examples of “mutualism” to her class.

Bees and Flowers	Ants and Aphids	Clownfish and Sea Anemones
		
Bees and flowers are like good friends in nature. Bees fly around to get yummy nectar from flowers and make honey. When bees stop on flowers, they take pollen from one flower to another. This helps flowers make seeds. So, flowers provide them with sweet nectar.	Aphids are little bugs and drink juice from plants, and ants like having them around. Ants keep aphids safe. To give thanks to ants, aphids make sweet honeydew and ants really love it. It's a win-win for both!	Sea anemones' stingers are not good for many fish, but clownfish can be safe from them. So, anemones can provide a happy and safe home for clownfish. Clownfish take little bugs to sea anemones, and sea anemones keep bad guys away from clownfish.
