Exploring Your Ordering Options

Customer: Excuse me! I've noticed this interesting machine over here. Can you tell me more about it?

Waiter: Of course. That's our latest ordering machine. It's like having a personal menu right at your finger! You can use it to look through all the yummy items on our menu and place your order with just a few touches.

Customer: Wow, that sounds wonderful! But are there any other benefits about using the machine?

Waiter: Great question! The machine is convenient because it's super quick. No more waiting for a waiter to take your order. And it always gets your order correctly.

Customer: I see! But I also enjoy chatting with people when ordering. Will I miss out on that if I order through the machine?

Waiter: Well, I'm afraid so. In that case, do feel free to let us know that you would like to order at your table. Any of our waitresses or waiters, like me, would be glad to help you and engage in personal chat about your favorite dishes or our famous dishes. I can even share some dishes that are behind the menu.

Customer: That sounds great! So, it's really about what I like, right?

Waiter: That's right! Whether you like things super quick and easy or enjoy chatting with friendly faces, we've got something for everyone!

Customer: Thanks for telling me about it! I'm sure I'll enjoy either option when I'm ready to order.

Waiter: No problem! If you have any questions or need help, just let me know. I'm here to make sure you have a fantastic dining experience!

 56. Who are them in the fourth paragraph?

答案:(C) The cyber armies.

 35.24% (A) The fake news.

教學策略:正確判斷代名詞

(56-59)

Today, we're facing a world where truth meets trickery, filled with fake news and cyber armies. Picture that a group of people using computers to spread fake news worldwide. That's what cyber armies do.

But don't worry, because we're like superheroes with capes made of truth! So, even fake news is like a puzzle, we can solve it by being smart. Here's how:

First, let's understand what fake news is. It's like a made-up story someone creates to cheat people. But we can use our skills to find out the real one, like double-checking facts on a fact-checking website! To make it short, real news is facts about events that have happened, while fake news often sounds unusual or unreasonable.

Now, let's talk about cyber armies. These are groups of people who use computers to make up and spread fake news and sometimes even cause trouble online. They're like the bad guys in our favorite superhero movies, but we're the heroes who can save the day! We can fight back against fake news and **cyber armies** by being watchful, spreading the truth instead, and surfing fact-checking website. In doing so, **we can help stop them from misleading people online.**

In the present day, cyber security is becoming more and more important to all of us. Next time, when we come across fake news, we can inform our friends and family the truth so they won't be tricked. Together, we can be superheroes who keep everyone safe and happy!
